

French Gulch-Whiskeytown School

FGWS Parents and Guardians: After spending hours trying to engage Lifetouch to take school pictures at FGWS and hitting dead end after dead end, we are pleased to announce that local photographer Michelle Steineke will be here May 26 to do the job. These will not be your standard school pictures. Michelle will have several different outdoor poses available. Younger siblings are welcomed to be in the pictures if you choose. Students may bring one "prop" if they like such as a baseball bat or glove. Proofs of the pictures will be available online. From that site, you may select a package that meets your budget, picture size and quantity needs. Thank you to Michelle who is not charging a fee for this service. And a special thank you to Lesley Pearson and Renay Hill who helped put this option in place for the school. More details to be announced later such as the time of the photo shoot.

OPEN HOUSE DATE CHANGE

Due to unforeseen circumstances, it is necessary to change the date of Open House. The date has been moved from Thursday, May 11 to Monday, May 15. It still begins at 6:00 starting with a casual family dinner: gourmet hot dog/polish bar. We will be show casing our clay room under the amazing direction of Donna Brashers. Incredible student art work will be on display ready to go home after the evening is over. Parents are invited to make their own little creations. Don't worry if you've never dabbled in clay before, your child and Mrs B will be on hand to get you started. Your masterpieces will be fired later for you. They will be available for pick up when the process is complete. We look forward to seeing everybody.

VIRAL BUGS MAKING THE ROUNDS

While there have been several reported cases of Covid in the school community, others are spiking fevers but testing negative for Covid. The CDC rule of thumb is in the absence of other symptoms; you should be fever free for a 24-hour period before returning to work or school. That 24-hour period does not include fevers brought down through use of medication such as Tylenol or Advil. Here's hoping this latest wave of viral attacks will be over soon. To everyone recouping, feel better soon!
